1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 08/25/10 has been entered.
2. Applicant had canceled claims 10, 22-36, 39, 40, 42-46, 49, 50, 52-56, 58, and 60-68. Applicant has added new claims 69-87. Currently, claims 1-9, 11-21, 37, 38, 41, 47, 48, 51, 57, 59, and 69-87 are pending. Examiner refers to the action below.

Allowable Subject Matter

3. Claims 1-9, 11-21, 37, 38, 41, 47, 48, 51, 57, 59, and 69-87 are allowed.
4. The following is an examiner's statement of reasons for allowance: None of the prior art of record, regarding claim 1, teaches the feature of "a processor communicatively coupled to the image scanner, the processor operable to create a data file comprising the one or more currency bill images, wherein each currency bill image is tagged with the extracted serial number of that currency bill and the identifier of the transaction involving that currency bill to allow for the involved one or more currency bills to be subsequently traced by serial number to

that transaction,” this, in combination with the other claim limitations. Regarding claim 37, none of the prior art of record teaches the feature of “using the processor or another processor, linking the currency bill image with the serial number(s) for the distributed currency bill(s) and the transaction identifier so as to allow the distributed currency bills to be traced to a certain transaction by their serial number,” this, in combination with the other claim limitations. Regarding claim 37, none of the prior art of record teaches the feature of “a processor communicatively coupled to the image device, the processor operable for linking the currency bill image(s) with the serial number(s) for the distributed currency bill(s) and the transaction identifier so as to allow the distributed currency bills to be traced to a certain transaction by their serial number,” this in combination with the other claim limitations. Regarding claim 37, none of the prior art of record teaches the feature of “a processor communicatively coupled to the imaging device, the processor operable for linking the currency bill image(s) with the serial number(s) for the distributed currency bill(s) and the transaction identifier so as to allow the distributed currency bills to be traced to a certain transaction by their serial number,” this in combination with the other claim limitations. Regarding claim 47, none of the prior art of record teaches the feature of “a processor communicatively coupled to the image device, the processor operable for linking the currency bill image(s) with the serial number(s) for the distributed currency bill(s) and the transaction identifier so as to allow the distributed currency bills to be traced to a certain transaction by their serial

number,” this in combination with the other claim limitations. Regarding claim 57, none of the prior art of record teaches the feature of “a processor communicatively coupled to the imaging device, the processor operable for linking the currency bill image(s) with the serial number(s) for the distributed currency bill(s) and the transaction identifier so as to allow the distributed currency bills to be traced to a certain transaction by their serial number,” this in combination with the other claim limitations. Regarding claim 69, none of the prior art of record teaches the feature of “using the processor or another processor, creating a data file comprising fields populated with at least a portion of the obtained currency bill images, wherein each currency bill image field is tagged to additional fields including the extracted serial number and the identifier of the transaction involving that currency bill thereby allowing the received currency bills to be subsequently traced by serial number to the transaction,” this in combination with the other claim limitations. Regarding claim 83, none of the prior art of record teaches the feature of “using a processor, linking the currency bill image(s) with the serial number(s) for the received currency bill(s) and the transaction identifier thereby allowing the received currency bills(s) to be traced to the reception transaction by their serial number, wherein linking comprises forming an image file populated with fields containing the at least partial image of each currency bill for that transaction, the serial number associated with the partial image, and the transaction identifier,” this in combination with the other claim limitations. Regarding claim 85, none of the prior art of record teaches the

feature of “a processor communicatively coupled to the imaging device, the processor operable for linking the currency bill image(s) with the serial number(s) for the received currency bill(s) and the transaction identifier thereby allowing the received currency bills to be traced to the reception transaction by their serial number, wherein the linking includes forming an image file populated with fields containing the image of each received currency bill, each extracted serial number, and the transaction identifier,” this in combination with the other claim limitations. Regarding claim 87, none of the prior art of record teaches the feature of “a processor communicatively coupled to the imaging device, the processor operable for linking the currency bill image(s) with the serial number(s) for the received currency bill(s) and the transaction identifier thereby allowing the received currency bills to be traced to the reception transaction by their serial number, wherein the linking includes forming a data file populated with fields containing the image of each currency bill for the reception transaction, the associated currency bill serial number, and the transaction identifier,” this in combination with the other claim limitations.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
